Development TODO List
What features people want.

NOTICE: The features and changes listed in this file are for informational purposes only. There is no guarantee that any items in the list will actually be applied to Mihalism Multi Host anytime in the near future because most are large undertakings.

Features & Changes:

1. Add commenting system to viewer
2. Add slideshow system
3. Add ability to password protect albums or specific images
4. Add system to randomly distribute images when uploaded across FTP servers
5. Add system to store images in dated folders instead of one large one
6. Add system to privatize specific albums
7. Move file report system from email to a gallery in the Admin Control Panel
8. Add ability to use more than one theme
6. Add ability to use more than one language
10. Add ability to regenerate a thumbnail from Admin Control Panel
11. Add flash upload/AJAX upload - either way a system to drag files
